## ***COPYRIGHT AND RESTRICTIONS***

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

## ***HISTORY***

The reports were created by employees of Zion, Bryce, Cedar Breaks and Civilian Conservation Corps. The majority of reports are written directly to the Superintendent; however reports were also generated to supervisors, peers and the public. The reports from 1925-1937 in this collection contain submittals from Bryce Canyon and Cedar Breaks to supervisors and the Superintendent of Zion National Park. The majority of the reports were written by park rangers, park naturalist, park clerical staff and supervisors of CCC projects. A variety of topics are documented. The most common are weather conditions, visitor information, accidents, wildlife, hunting and construction projects. Within the reports graphs, photographs and spreadsheets are included. The reports dated after 1937 are solely generated by staff at Zion National Park. Information regarding Bryce, Cedar Breaks and CCC activity are only noted, full reports are not included.
