## ***COPYRIGHT AND RESTRICTIONS***

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

## ***HISTORY***

Mukuntuweap National Monument was established on July 31, 1909, by Presidential Proclamation. On March 18, 1918, the name was changed to Zion National Monument. At this time 61,600 acres were added to the Monument. Zion National Park was established from Zion National Monument on November 19, 1919 and included all lands formerly in the Monument. On June 13, 1930, congress approved Public Law No. 351, which added 17,441 acres to the Park. On January 22, 1937, a separate area was established which was called Zion National Monument, gross acreage of the Monument was 48,414 acres. Zion National Monument was Made part of Zion National Park on July 11, 1956, all lands formerly in the Monument were added to the park. Total acreage was 142,655 acres. After boundary changes were made in 1960, total acreage was 146,610 acres. As of 1970 the gross acreage was 147,035 acres. Zion is an ancient Hebrew word meaning "a place of refuge." The park landscape contains dramatic cliff and canyon views. Within the park is the world's largest natural arch. Zion is located at the junction of the Colorado Plateau and Great Basin and Mojave Desert Provinces.

These records contain the information and reports from the Superintendents of Zion National Park from the years 1928 – 1972.
