COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

HISTORY

Wildcat West Burn Unit Archeological Survey: Cultural Resource Survey of 1280 acres of Zion National Park land located on the Upper Kolob Plateau, Utah. Resource Management Project Number 99-03, State Historic Preservation Office (SHPO) Project Number U-99-NA-0535n.

A century of fire suppression activities has resulted in the accumulation of hazardous fuels throughout many areas of Zion National Park. To combat this hazard, Zion has developed a program to reduce the fuel loads through controlled, prescribed fires. Since the prescribed fire and related activities had the potential to affect historic properties a survey of cultural resource was undertaken. An archeological survey was conducted within an area of approximately 1280 acres (750 acres could be intensively inventoried), located in the northwestern portion of Zion National Park on the Upper Kolob Plateau. Two new sites (42WS3916 and 42WS3917) and 17 isolated occurrences were recorded during the survey. Both new sites are open prehistoric lithic scatters with no identifiable features. Field work was conducted between June 9 and 16, 1999 by Wade Kaiser and Nikole Christianson with volunteer Andrea Perez, under the supervision of archeologist Mathew Betenson.
